

Concept

# Analogous Concepts

**Intrinsic Analogy:** when the concept itself is of a proportion it is essentially analogous

**Extrinsic Analogy:** when the concept itself is not of a proportion but is PLACED in a proportion, it is not essentially analogous

**Metaphor:** when the concept does not properly apply to something but is extended to it because of some accidental likeness or resemblance

**Attribution:** when the concept does not properly apply to something but is extended to it because of some causal relationship
